15-100 ml
Per 100Ltr
Water**

Presentation :
1 Ltr, 500 ml & 250 ml

D-ZOLE (Difenoconazole 25% EC)

Mode of Action ►

D-Zole is a systemic fungicide with excellent action against diseases such as Apple scab, Sheath blight in Paddy, Dieback and Fruit rot in Chilli Crop, Anthracnose & Powdery mildew in Grapes and Fruit Rot in Pomegranate. It provides excellent control for various diseases on a number of crops. It can be used as protective and curative use.

Recommendation ►

Crop (S)	Common Name of Diseases	Dosage / HA		Dilution in water (Litre)
		a.i. (gms)	Formulation (ml)	
Apple	Scab	0.004% or 4 g/ 100Ltr Water	0.015% or 15ml / 100Ltr Water	As required depending upon the size of the plant and plant protection equipment used.
Paddy	Sheath blight	0.0125% or 12.5 g/ 100Ltr Water	0.05% or 50ml / 100Ltr Water	500
Chilli	Dieback & Fruit rot	-do-	-do-	500-1000 (As per size of plant)
Grapes	Anthracnose & Powdery mildew	0.0075% or 7.5 g / 100 Ltr water	0.03% or 30ml / 100Ltr water	500
Pomegranate	Fruit Rot (Colletotrichum gloeosporioides)	0.025% or 25g/100Ltr water	0.1% or 100ml / 100Ltr water	500

Method of Use ►

Measure required quantity of the product and mix it well with a small quantity of water. Add the remaining quantity of water as specified with thorough agitation for high volume of application through knapsack sprayer of high volume sprayers.
